

# Activity Diagram

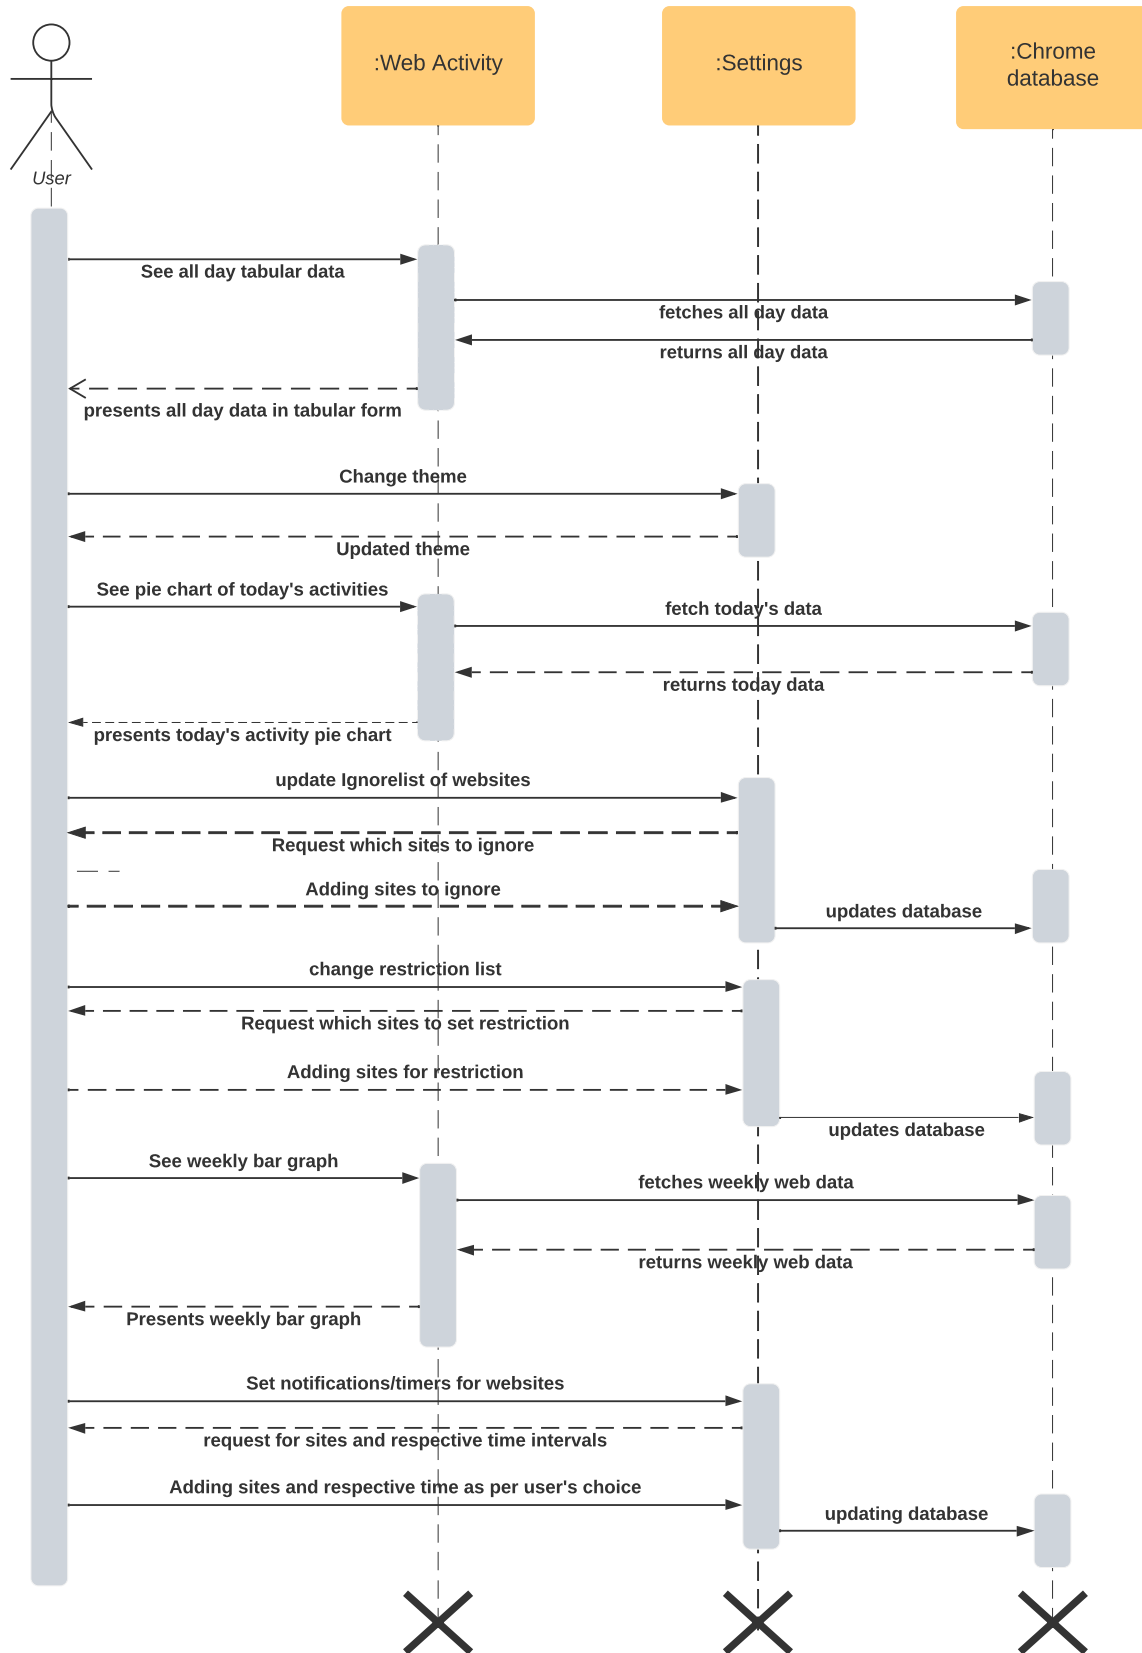

Dev Goel (B20CS090) Ravi Ramavat (B20CS053) | March 20, 2022

This Activity diagram is an extension of use case diagram. It is essentially a flowchart that shows activities performed by a system. This diagram demonstrates steps performed in use case diagram. It simplifies and improves any process by clarifying the complicated use cases.

## Sequence Diagram

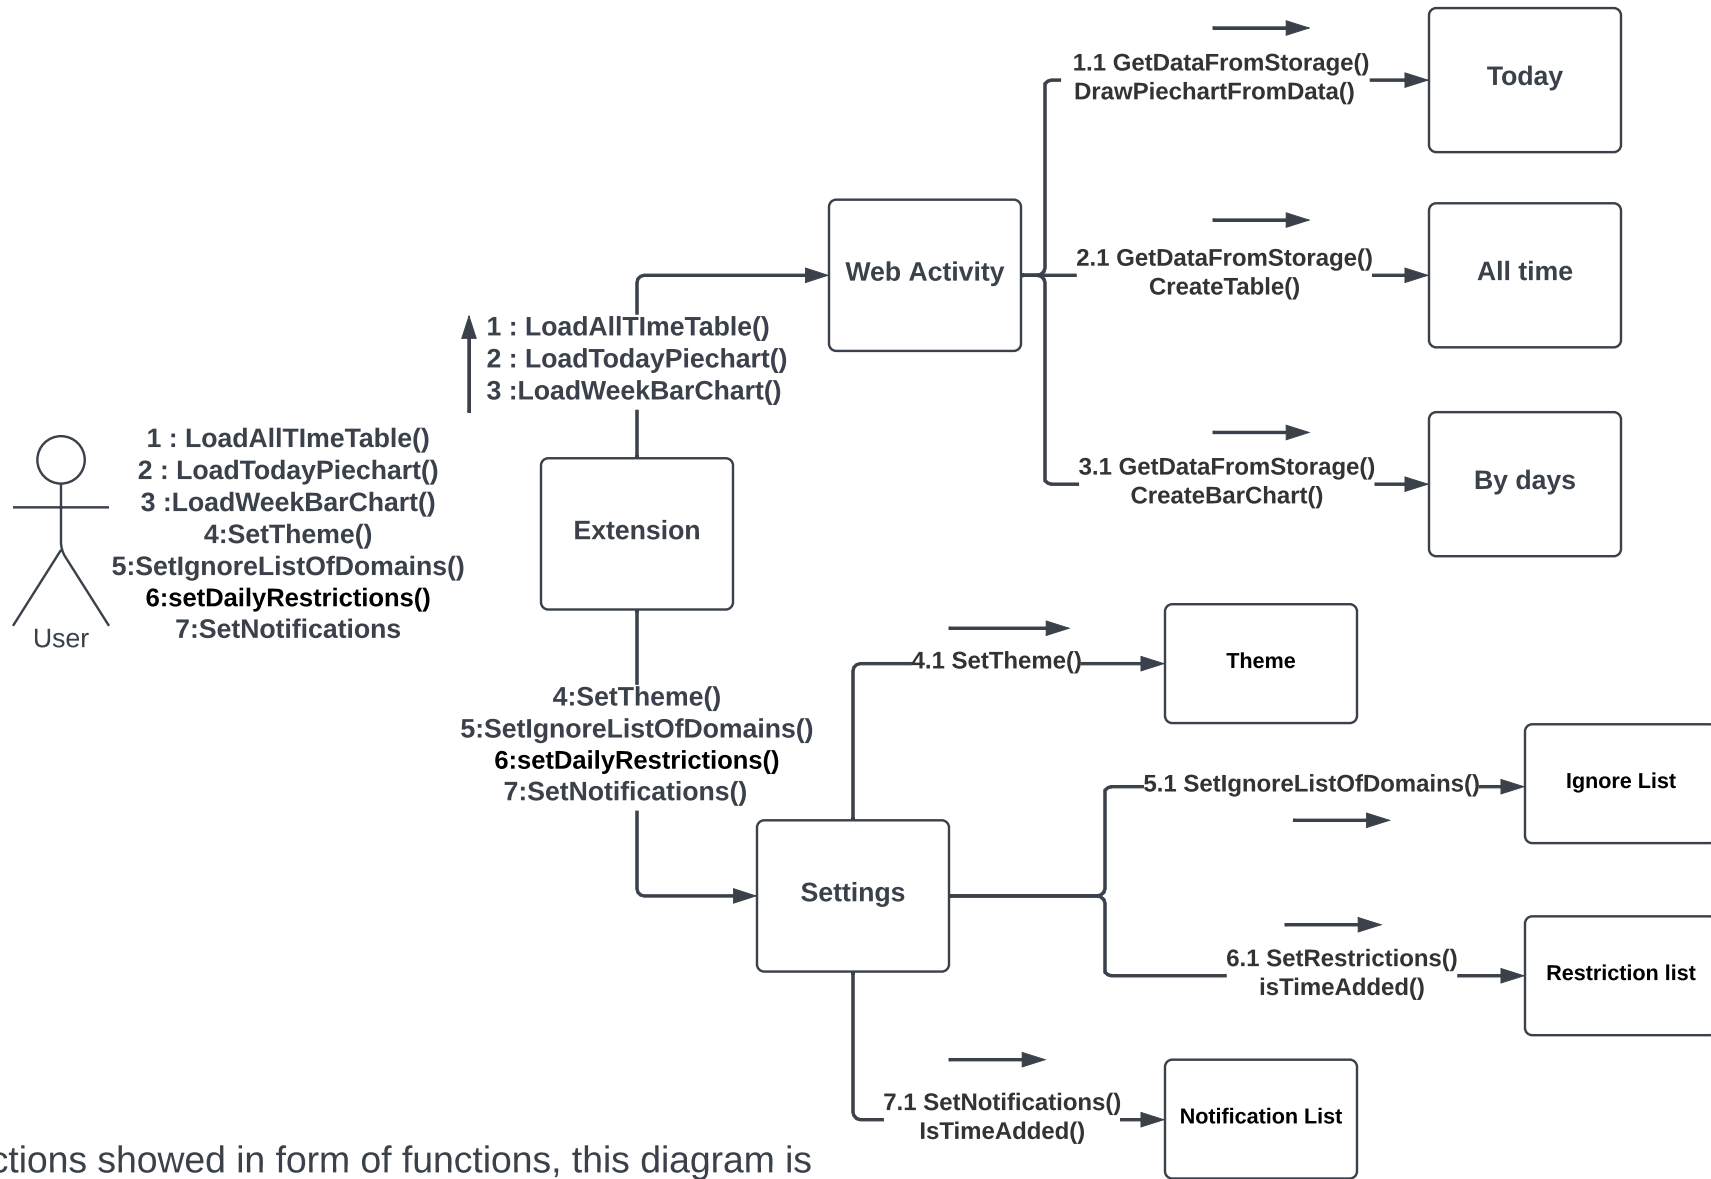

Dev Goel (B20CS090) Ravi Ramavat (B20CS053) | March 20, 2022

This sequential diagram shows how actions will be executed and their relative execution time with 4 major Objects (User, Webactivity, Chrome database, Settings). It helps understand event scenarios, it describes how and in what order a group of objects works together.

# Collaboration Diagram

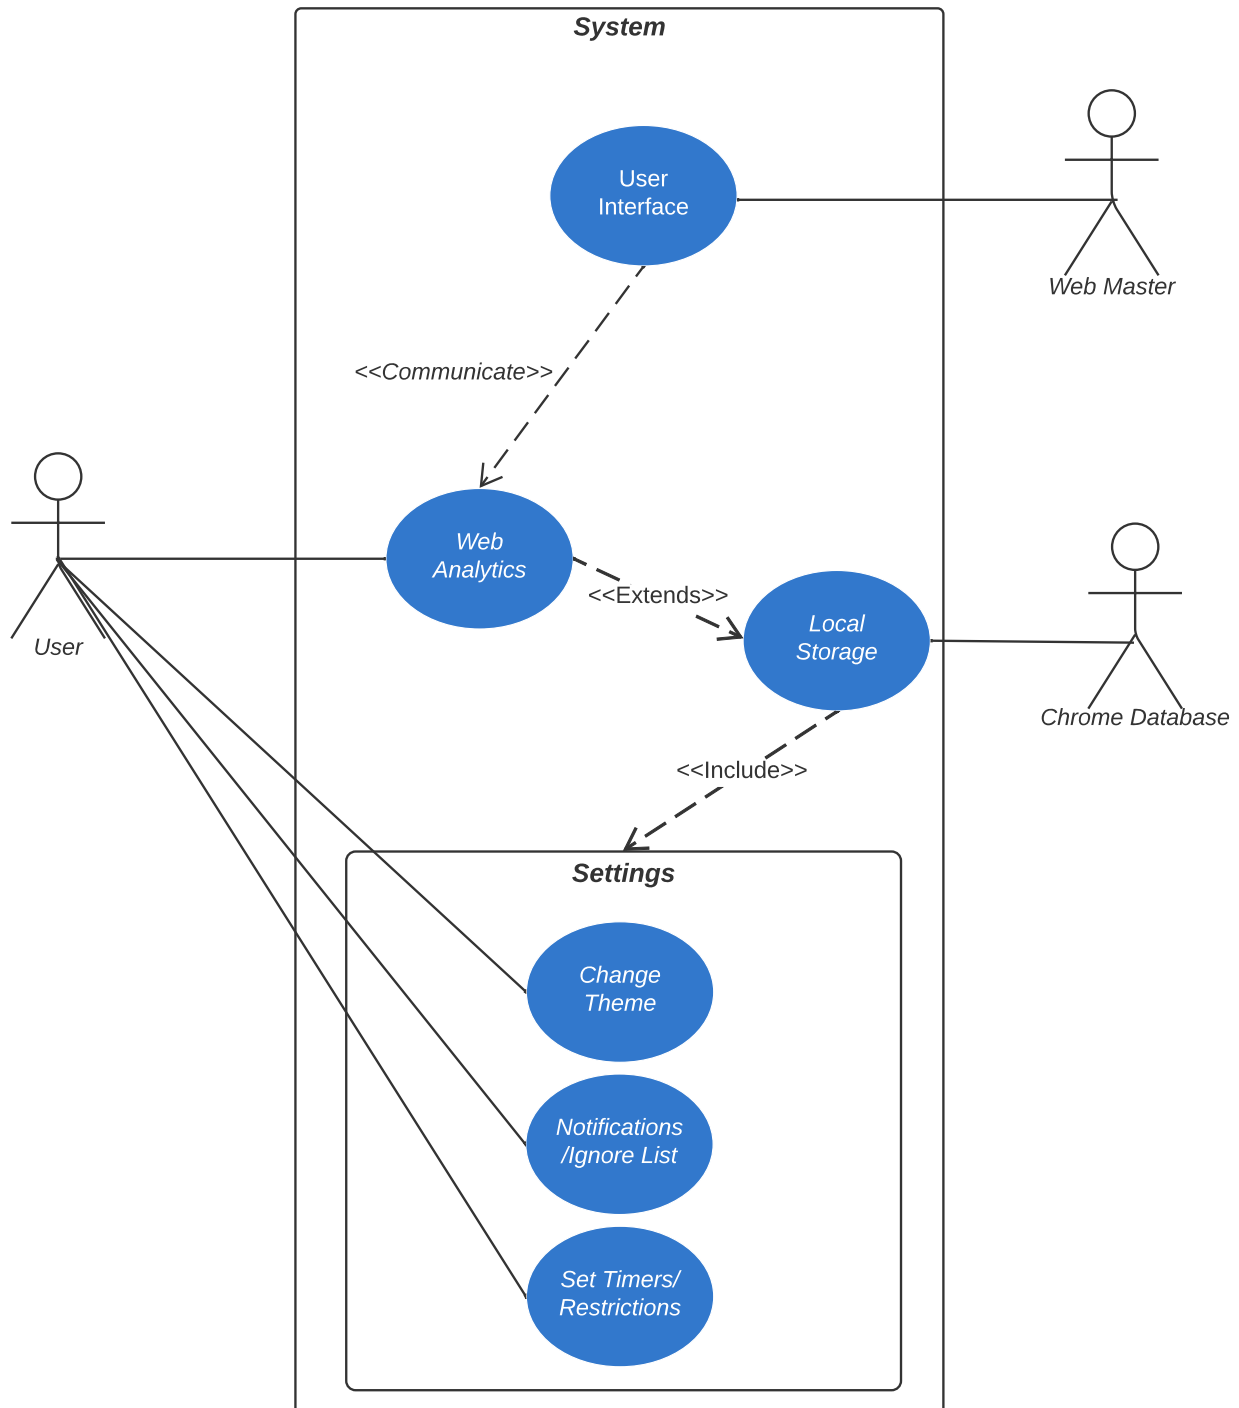

Dev Goel (B20CS090) Ravi Ramavat (B20CS053) | March 20, 2022

There are 7 actions showed in form of functions, this diagram is extension of sequence diagram, it depicts the architecture of the object residing in the system. Functions in the next stage are there to complete the actions(1.1,2.1 etc).

# Use Case Diagram

Dev Goel (B20CS090) Ravi Ramavat (B20CS053) | March 20, 2022

It helps demonstrate the different ways that a user might interact with a system. There are 4 use cases of our extension, first the main use case which is web activity tracker and the other 3 are setting use cases.
